

SUMMARY

Senior UX Designer with 6+ years designing complex B2B, enterprise SaaS, and healthcare platforms, with deep experience translating ambiguous product requirements into user-centered design solutions at scale. Skilled at partnering with cross-functional stakeholders — product, engineering, and leadership — to research, define requirements, and drive design strategy within Agile/Scrum delivery cycles. Specializes in AI-assisted and agentic UX, trust-driven interaction design, and communicating design trade-offs and recommendations that shape product roadmaps. Proven track record architecting design systems adopted across 5+ product teams and driving usability research programs that directly influence business decisions.

EXPERIENCE

Senior UX Designer · Hane Infotech

Dec 2023 – Present

- **Navigated ambiguity in product strategy and requirements** for enterprise SaaS and healthcare platforms — facilitating design exercises and workshops with product and engineering stakeholders to shape and prioritize user stories ahead of solution design.
- **Operated within Agile/Scrum delivery cycles**, running sprint design reviews, retrospectives, and stakeholder critiques to keep design decisions aligned with evolving technical and business constraints.
- **Authored design documentation and stakeholder presentations** that clearly communicated recommendations, limitations, and trade-offs — directly informing roadmap prioritization across 5+ product teams.
- **Architected a Figma design system** of 85+ components across 12 categories, reducing design-to-dev handoff time by 40% and eliminating repetitive QA cycles — a shared foundation for cross-team consistency at scale.
- **Drove 3+ moderated usability testing programs**; synthesized findings using customer insights and data into stakeholder presentations that directly influenced roadmap prioritization and risk mitigation.
- **Established pixel-level Design QA standards** and mentored junior designers through structured critique — raising craft quality and usability rigor across all shipped features.

UX Designer · Syncfusion Private Ltd.

May 2022 – Dec 2023

- **Designed complex B2B and enterprise data-application workflows** — leading information architecture and high-density data table design for large-scale user bases, working closely with product and engineering to resolve ambiguous requirements.
- **Partnered cross-functionally on requirement analysis**, turning ambiguous briefs into clear, user-centered interface decisions through annotated prototypes and UI specifications reviewed with technical stakeholders.
- **Architected a structured Figma system** (components, auto-layout, variables, theming) that became the shared design foundation ensuring consistency across all product releases.
- **Authored developer documentation and annotation standards**, elevating cross-team communication quality during design-to-engineering handoff.

UX & Graphic Designer · D Cubes

Jun 2020 – Apr 2022

- **Built brand and visual-language systems** for 10+ B2B clients across fintech, retail, and services — delivering style guides and scalable asset libraries for long-term consistency.
- **Applied a systems-first, component-based approach** to visual design, directly informing the structured, stakeholder-facing design thinking used in later enterprise roles.

SELECTED PROJECTS — AI & ENTERPRISE PRODUCT DESIGN

Aria — Agentic AI Assistant UX · B2B SaaS · Shipped · 12k+ users

Challenge: 72% first-session abandonment demanded a rethink of how an AI agent earns user trust in a B2B workflow.

- **Led end-to-end design for agentic AI experiences** over 6 months — defining confidence-signal design, source-attribution patterns, failure-recovery flows, and prompt scaffolding for autonomous AI interactions.
- **Ran 24 moderated interviews and 2 diary studies**, using customer insights and data to balance AI transparency with usability — directly shaping the product's trust architecture.
- **Impact:** 68% reduction in time-to-insight · 4.6 CSAT across 12k users · self-reported AI confidence up from 19% to 41% · 30-day retention exceeded target.

Clinico AI — Healthcare Copilot System · Web + iOS + Android

Challenge: reconciling two opposing stakeholder mental models — patients needing warmth and simplicity, clinicians needing ruthless information hierarchy in under 90 seconds.

- **Defined a dual-surface design system** over 14 months with context-aware rendering and 3 distinct AI interaction modes (Copilot, Chat, Agent), navigating conflicting stakeholder requirements to a single coherent architecture.
- **Designed HIPAA-compliant, sub-1.2s-load AI interfaces**, reducing clinician alert fatigue through prioritized information hierarchy — informed by direct research with clinical stakeholders.

EduPulse AI — Connected Intelligence for Schools · EdTech SaaS · Multi-role Platform

- **Designed a four-role connected intelligence layer** (Admin, Teacher, Student, Parent), facilitating cross-stakeholder alignment on distinct information needs while maintaining one coherent product architecture.
- **Architected the AI/data layer experience**: NLP risk-scoring UI, sentiment-analysis dashboards, and engagement mechanics — achieving 91% teacher dashboard adoption and a 4.6 student companion rating.

CORE SKILLS

Strategy & Process: Ambiguity Resolution, Agile/Scrum Design Process, Cross-functional Stakeholder Facilitation, Design Documentation & Trade-off Communication, Data-Informed Design Decisions, Design Workshops

AI & Enterprise UX: Agentic Experience Design, AI Interaction & Trust Design, B2B/Enterprise SaaS Design, Information Architecture, High-Fidelity Prototyping, Accessibility (WCAG 2.1 AA)

Design Systems: Figma Design Systems & Tokens, Component Architecture, Design QA & Handoff, Responsive & Cross-platform Design

Leadership: Team Mentorship, Stakeholder Presentations, Usability Research Programs, Design Critique & Reviews

TOOLS

Figma · FigJam · Adobe Illustrator · Photoshop · Tokens Studio · Maze · Hotjar · Miro · Notion · Jira · Zeplin · Figma AI · Midjourney

EDUCATION

B.E. Civil Engineering · Sethu Institute of Technology

Engineering foundation informs systems-level design thinking — structure, constraints, and scalability — applied directly in design system architecture.

UX Jump Starter Program · Imagine X

INTERESTS

Freelance Portrait Artist — fine-arts practice sharpening visual precision, composition, and craft detail.

National-Level Bodybuilding — demonstrates long-term discipline, goal-setting, and high-performance commitment under constraints.
